

# Qobs.txt

The file is located in the `modeldir` folder. Discharge ( $m^3/s$ ) is given for consecutive timesteps for selected subbasins for a continuous time period of daily values which doesn't need to cover the whole simulation time period. Missing values should be -9999.

The first row includes a text string (e.g. date, no spaces allowed) and then subbasin id (`subid` from [GeoData.txt](#)). The first column is date in the format `yyyy-mm-dd [HH:MM]`. If set in [info.txt](#) that `matlab-format` should be read (`readformat 1`) the date format is `yyyymmdd`. The second to last columns are discharge for given subbasins (i.e. not all subbasins required).
